ABOUT US

In 2015, while searching for a conversion kit to turn our son's crib into a full-size bed, we ran into a frustrating problem - the crib had been discontinued, and the conversion kit was nearly impossible to find. When we finally did locate one, we were shocked by the poor quality. It was made from plywood, and we simply didn't feel comfortable letting our son sleep on it. After talking with other parents, we realized we weren't alone. Many families had invested significant money in quality cribs and matching furniture, only to discover that safe, durable conversion kits were either unavailable or poorly made. That's when we decided something had to change. We set out to create crib conversion kits that parents could truly trust - kits made from 100% solid wood, designed to last, and crafted with the same care you expect for your child's safety and comfort. Our goal was simple: make it easy for parents to extend the life of their child's crib without compromising on quality. And that's how Grow-with-Me Crib Conversion Kits was born.
